

Take the initiative to help heal your bone

Bone healing discussion guide for you and your doctor

Broken bones are sometimes hard to heal. Only your doctor is qualified to diagnose a nonunion fracture. If you think that your fracture is not healing, answer the questions below and take it with you to your next appointment with your doctor. You and your doctor can begin a discussion regarding the addition of EXOGEN Ultrasound Bone Healing System to your current fracture treatment:

Name: _____ Date of birth: _____ Date fracture occurred: _____

Mark the box that corresponds to your broken bone:

<input type="checkbox"/> 5th metatarsal	<input type="checkbox"/> Humerus	<input type="checkbox"/> Scaphoid
<input type="checkbox"/> Clavicle	<input type="checkbox"/> Phalanges	<input type="checkbox"/> Talus
<input type="checkbox"/> Femur	<input type="checkbox"/> Radius	<input type="checkbox"/> Tibia
<input type="checkbox"/> Fibula	<input type="checkbox"/> Ribs	<input type="checkbox"/> Ulna

I have one or more of the following conditions (check all that apply):

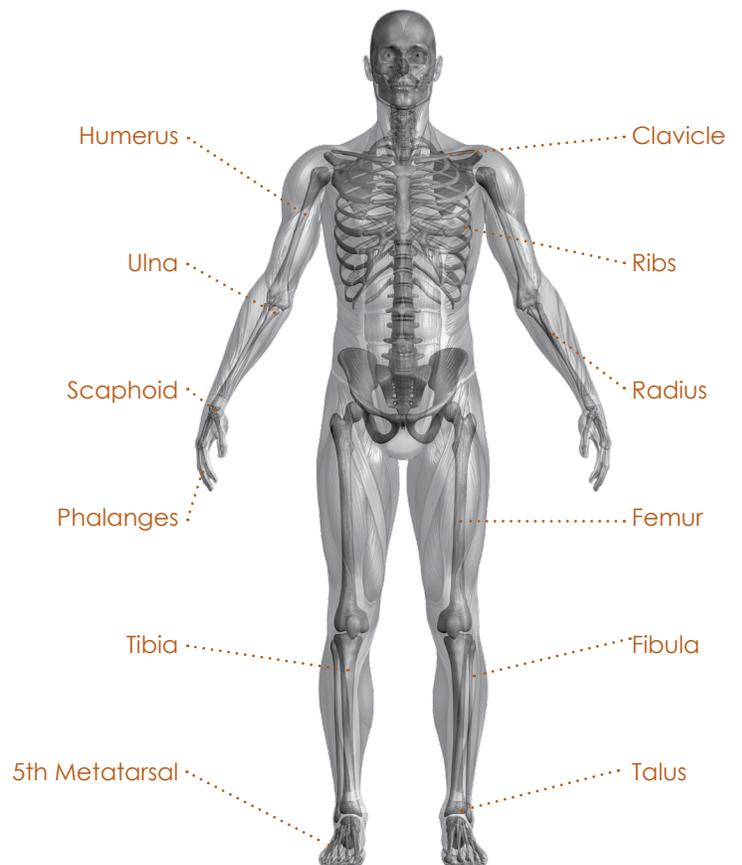

Anemia
 Diabetes
 Nutritional deficiency
 Obesity
 Osteoporosis
 Vascular insufficiency

I have smoked or used tobacco within the last six months:

Yes No

I am currently taking the following medications (check all that apply):

Anticoagulants
 Corticosteroids
 COX-2 Inhibitors
 NSAIDs (aspirin, ibuprofen, naproxen)
 Other: _____

Summary of Indications for Use:

The EXOGEN Ultrasound Bone Healing System is indicated for the non-invasive treatment of established nonunions* excluding skull and vertebra. In addition, EXOGEN is indicated for accelerating the time to a healed fracture for fresh, closed, posteriorly displaced distal radius fractures and fresh, closed or Grade I open tibial diaphysis fractures in skeletally mature individuals when these fractures are orthopaedically managed by closed reduction and cast immobilization.

There are no known contraindications for the EXOGEN device. Safety and effectiveness have not been established for individuals lacking skeletal maturity, pregnant or nursing women, patients with cardiac pacemakers, on fractures due to bone cancer, or on patients with poor blood circulation or clotting problems. Some patients may be sensitive to the ultrasound gel. Full prescribing information can be found in product labeling, at www.exogen.com, or by calling Bioventus at 1-800-836-4080.

*A nonunion is considered to be established when the fracture site shows no visibly progressive signs of healing.
